Automation TestScript Document :-Java Selenium

Tester Name:-Pradnya Shinde SR QA

```java
import org.openqa.selenium.By;

import org.openqa.selenium.WebDriver;

import org.openqa.selenium.WebElement;

import org.openqa.selenium.chrome.ChromeDriver;

import org.testng.Assert;

import org.testng.annotations.*;

public class AddTutorialTest {

    WebDriver driver;

    @BeforeClass
    public void setup() {

        System.setProperty("webdriver.chrome.driver", "path/to/chromedriver");

        driver = new ChromeDriver();

        driver.manage().window().maximize();

    }

    @Test
    public void verifyAddFunctionality() {

        driver.get("http://qa-assesment.eutech.org/tutorials");

        // Click on Add Tutorial or go directly to add page if exists
```

```java
        WebElement addButton = driver.findElement(By.id("add-tutorial")); // Example locator

        addButton.click();

        // Fill title and description

        WebElement titleInput = driver.findElement(By.id("title"));

        WebElement descInput = driver.findElement(By.id("description"));

        WebElement submitBtn = driver.findElement(By.id("submit"));

        titleInput.sendKeys("pradnya");

        descInput.sendKeys("Test tutorial description.");

        submitBtn.click();

        // Wait for success message or confirmation (can use WebDriverWait here for dynamic wait)

        WebElement successMessage = driver.findElement(By.xpath("//*[contains(text(),'Tutorial was submitted successfully!')]"));

        Assert.assertTrue(successMessage.isDisplayed(), "Tutorial was not added successfully.");
    }

    @AfterClass
    public void tearDown() {

        driver.quit();
    }
}
```
